(54) **Title:** VIRTUAL OBJECT CONTROL METHOD AND APPARATUS, DEVICE, AND READABLE STORAGE MEDIUM

(54) 发明名称: 虚拟对象的控制方法、装置、设备及可读存储介质

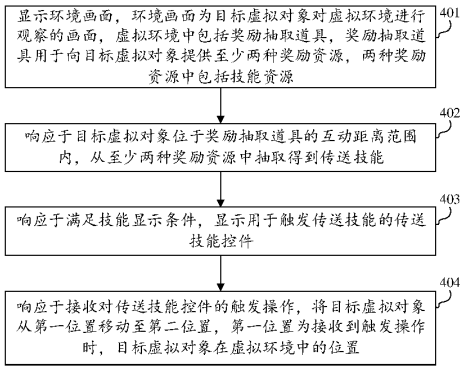

图 4

401 Display an environment picture, wherein the environment picture is a picture of a virtual environment viewed by a target virtual object, the virtual environment comprises a reward drawing prop, the reward drawing prop is used for providing at least two reward resources for the target virtual object, and the two reward resources comprise a skill resource

402 In response to the target virtual object being located within an interaction distance range of the reward drawing prop, draw a teleportation skill from the at least two reward resources

403 In response to meeting a skill display condition, display a teleportation skill control for triggering the teleportation skill

404 In response to receiving a trigger operation on the teleport skill control, move the target virtual object from a first position to a second position, wherein the first position is the position of the target virtual object in the virtual environment when the trigger operation is received

(57) **Abstract:** Provided are a virtual object control method and apparatus, a terminal, and a readable storage medium. The method comprises: displaying an environment picture, wherein a virtual environment comprises a reward drawing prop; in response to a target virtual object being located within an interaction distance range of the reward drawing prop, acquiring a teleportation skill from the reward drawing prop; in response to meeting a skill display condition, displaying a teleportation skill control for triggering the teleportation skill; and in response to receiving a trigger operation on the teleportation skill control, moving the target virtual object from a first position to a second position. By means of acquiring a teleportation skill from a reward drawing prop that provides skills for a target virtual object and operating a displayed teleportation skill control when a skill display condition is met, the target virtual object can be moved from a first position to a second position only by means of operating the teleportation skill control, such that the man-machine interaction efficiency in the process of controlling the target virtual object to move is improved.

(57) 摘要：虚拟对象的控制方法、装置、终端及可读存储介质，方法包括：显示环境画面，虚拟环境中包括奖励抽取道具；响应于目标虚拟对象位于奖励抽取道具的互动距离范围内，从奖励抽取道具内获取传送技能；响应于满足技能显示条件，显示用于触发传送技能的传送技能控件；响应于接收对传送技能控件的触发操作，将目标虚拟对象从第一位置移动至第二位置。通过从向目标虚拟对象提供技能的奖励抽取道具中获取传送技能，并在满足技能显示条件的情况下对显示的传送技能控件进行操作，只需通过对于传送技能控件的操作即可将目标虚拟对象从第一位置移动到第二位置，提高了控制目标虚拟对象进行移动过程中人机交互的效率。
