(54) Title: SYSTEM AND METHOD FOR SIGNAL AND DATA ROUTING

Figure 2: New System & Flow Diagram

(57) Abstract: The present invention relates generally to data and signal routing. More particularly, the present invention relates to certain new and useful advances in invitation routing for conference sessions, of which the following is a specification, reference being had to the drawings accompanying and forming a part of the same. Conferencing through various forms of media has rapidly evolved in the last few decades, particularly due to the introduction of low-cost, high-capacity communications networks. Videoconferencing and videophone calling, in particular, have made significant strides due in part to the development of tablet computers and smart phones, but also globalization of the market.

**Declarations under Rule 4.17:**

- as to the identity of the inventor (Rule 4.17(i))
- as to applicant's entitlement to apply for and be granted a patent (Rule 4.17(ii))
- as to the applicant's entitlement to claim the priority of the earlier application (Rule 4.17(iii))

— of inventorship (Rule 4.17(iv))
