ABSTRACT

The present application discloses an electronic payment service processing method and device, and an electronic payment method and device. The service processing method includes: receiving, by a server, a first service information set needed for electronic payment service processing, to perform the electronic payment service processing; determining whether the electronic payment service processing fails, and if yes, determining, based on a type of the electronic payment service processing failure, whether to generate a re-payment entrance, where the re-payment entrance can be associated with a second service information set, and the second service information set is formed after a corresponding element in the first service information set that causes the electronic payment service processing failure is adjusted; and after generating the re-payment entrance and receiving an instruction indicating that the re-payment entrance is triggered, performing the electronic payment service processing by using elements in the second service information set and a third service information set, where the third service information set is a difference set of the first service information set and the second service information set. The methods and devices improve user experience.
