

ABSTRACT

NEW COMPOUND, PREPARATION METHOD AND USE THEREOF

Disclosed is a new compound, a preparation method and use thereof. The new compound of the application is prepared by extracting and separating from Limax, and has significant effects on physiological or psychological dependent detoxification or detoxication. Pharmacological tests have proved that the compound has a significant inhibitory effect on withdrawal jumping symptoms in morphine-dependent animals 1 hour after intragastric administration, and still shows an inhibitory trend after 3 hours. The compound has potential application value in the preparation of medicines, health food, and food for detoxification, detoxication, or similar drug-dependent treatment.
