Title : Godbass Artificial Planet in Space (GAPS)

Description

1. Owner, Copyright, and Originator of “Godbass Artificial Planet in Space (GAPS)” is Inventor Sri. Dhanasekaran Basker, Mechanical Engineer, Co-ordinator, Business Owner of WIN International Networks, Singapore.

WIN International Networks Team Supporters are;

2. Inventor Sri. Godbass Srivathshan, Electrical with Eco Design and Electronics Engineer, Entertainer, Business Partner of WIN International Networks.
3. Inventor Madam. Govindaraj Selvi, Computer Science Engineer & Information Technology Educationist.

Contents

1. Introduction
2. Historical References & Observations
3. Recent Developments and Achievements in SAISET and Docking & Undocking
4. Structural (Design & Build) Features of GAPS
5. Functional (Operation & Maintenance) Features of GAPS
6. Applications & Uses of GAPS
7. Advantages
8. Potential and Future of GAPS (GAPS Trillion$ SAISET)
9. Conclusion

Claims

Abbreviations

GAPS: Godbass Artificial Planet in Space

SAISET: Space, Artificial Intelligence, Science, Engineering & Technologies

IDA: International Docking Adapter

PMA: Pressurised Mating Adapter

APAS: Androgynous Peripheral Attach System

CBM: Common Berthing Mechanism (Active CBM & Passive CBM)

OS: Orbital Segments

BP: Berthing Ports

SS: Space Shuttle

SDU: Space Docking and Undocking

DKM: Dog Knot Mechanism

1. Introduction

a) "Godbass Artificial Planet in Space (GAPS)" is dedicated to all in Multiverses.

b) "Godbass Artificial Planet in Space (GAPS)" is new, novel, first of this kind in whole multiverses, industrial applicable Invention, by Concept, Design, and Origination by Sri. Dhanasekaran Basker & to be Build, Operate and Maintain by Planet Earth's Global likeminded various International Space Organizations, Governments, Supporters, Global Public, Space Enthusiasts and Space Tourists.

c) "Godbass Artificial Planet in Space (GAPS)" is a combined Project of Godbass Srivathshan, Govindaraj Selvi & Dhanasekaran Basker's invention and Proposal to Planet Earth's Globe supporters, Governments and Global Public to Fund to further enhance the Design, Build, Operate & Maintain the "Godbass Artificial Planet in Space (GAPS)".

d) While Sri. Dhanasekaran Basker observing the sky planets, this “Godbass Artificial Planet in Space (GAPS)” is originated in Sri.Dhanasekaran Basker by virtue of atoms & molecules and space multiverses.

2. Historical References & Observations

a) Ancient Historical Reference to the Epic Ramayana, King Cowsica, the Raja Rishi Sri. Viswamithra (Sri. Viswamithra name meaning is “Friend of All Worlds”) created Artificial Heaven Planet in Space for the King Sri. Trisangu. In the Valmiki Ramayana, Maharishi Vishwamitra, in order to fulfil his promise to Trishanku, started creating a parallel universe (Artificial Heaven), with its own Brahma and its own “Swarga (heaven)”. The GODs were left in awe, for the sage had created an Artificial Heaven, even better than the original. Trishanku got his wish fulfilled.

b) Also reference to The Hindu Parana, Amrita is repeatedly referred to as the Divine Nectar drink of devas, which grants them immortality (Ever Living (Deathless) Life) and those who drunk the Divine Nectar (Amrita) for live ever immortal and those Divine Nectar (Amrita) drunk by Devas (Devas means GOD (Good Elements)) of planets named Earth, Sun, Moon, Mars, Mercury, Jupiter, Venus, Saturn and Asuras (Asuras means Monster (Bad Elements)) Rahu, Kedu and so on. This is the reason those planets (Devas) are immortal and living for ever. But, other than those Asuras (Monsters) are not drunk the Divine Nectar (Deva Amirtham) are not immortal and died. Either this reference could be a coincidence or purposely gave those planet (Devas) names for immortal ever living status in Tamil and Sanskrit Indian Astrology, Astrophysics and Indian Jodhidam.

c) Similarly, we can Design & Build an Artificial Planet in Space named by Inventor Dhanasekaran Basker as “Godbass Artificial Planet in Space (GAPS)” for our space tourists and to conduct permanently various space researches there. This “Godbass Artificial Planet in Space (GAPS)” is required now to the humans in planet earth and is possible now by our modern Space, Artificial Intelligence, Science, Engineering and Technologies (SAISET).

d) Following are Sri. Dhanasekaran Basker’s observation for our better understanding to Design & Build an immortal, long life and ever living “Godbass Artificial Planet in Space (GAPS)”. A) Observation 1: Naturally almost all the existing planets and objects in the space are spherical (Globe or Bubble) in shape. Example Earth, Sun, Moon, Mars, Mercury, Jupiter, Venus, Saturn. Verify this by refer in any astrology books and/or look sun and moon

in the sky. B) Observation 2: Almost all the planets are stationary and/or moving and/or self-rotating and/or rotating another space objects showing their faces or sides towards lighted or solar objects to energise themselves independently using lights and available sources in the planets and space. C) Observation 3: Almost all the planets or space objects are looks from far having smoothed surfaces, but, actually do not having smooth surfaces, but has rough, uneven valleys, mountains, etc.

3. Recent Developments and Achievements in SAISET (Space, Artificial Intelligence, Science, Engineering & Technologies) and Docking & Undocking

a) As the planet earth space researchers already completed and experienced in various docking and undocking methods such as IDA: International Docking Adapter, PMA: Pressurised Mating Adapter, APAS: Androgynous Peripheral Attach System, CBM: Common Berthing Mechanism (Active CBM & Passive CBM). This Docking and Undocking experiences can be used to Design & Build “Godbass Artificial Planet in Space (GAPS)” for humans living in the entire planet earth.

b) Inventor Sri. Dhanasekaran Basker is presenting here the first of this kind mechanism, new, novel, inventive, industrial applicable “Dog Knot Mechanism” for space Docking and Undocking “Godbass Artificial Planet in Space (GAPS)” Satellite Segments (Components). Dog Knot Mechanism for Docking and Undocking for “Godbass Artificial Planet in Space (GAPS)” is shown in Figure 2. The Dog Knot Mechanism for Docking and Undocking consists of Male and Female components in the segments. Once the two mating and/or connecting segments are inline and aligned to fit by various sensors, the male component moves into the female component. Once the male component entered fully into the female components, the tip and/or base of the male component is/are expand (Swells) by various mechanical and/or hydraulic and/or pneumatic and/or electric & electronics methods and components to lock firmly to various movements of segments. While Undocking these male components expanded (swell) portion shall be bring to normal straight by various mechanical and/or hydraulic and/or pneumatic and/or electric & electronic methods and components to unlock as at the time of fully entering, and then pull-out the male component from female component. Each segments shall have one and/or many male components and female components as per required by the design and build requirements. Also, if one Dog Knot Mechanism is not enough to tie strongly the segments Group and/or Multiple / many (More than one) Dog Knot Mechanism can be fitted and fixed firmly the docking to be safer. After firmly

docked the segments, through the male and female Dog Knot Mechanism, the humans and materials can pass through from one segment to another. Hence, Dog Knot Mechanism is also a pass through way connector to one segment to another, in addition to help Docking and Undocking the segments.

4. Structural (Constructional Design & Build) Features of GAPS

a) Method to Design & Build "Godbass Artificial Planet in Space (GAPS)" is Atomic Structure and/or Molecule Structure and/or Honeycomb Structure and/or Bubble Structure and/or other best suitable structure methods already available and/or will be developed and available in future to be using.

b) "Godbass Artificial Planet in Space (GAPS)" is (Independently Structured and Functioning) segments based Attached and Detached by various suitable Docking and Undocking method such as Dog Knot Mechanism and so on.

c) Steel and/or other suitable material electro-magnetic shows and glows with lifeline and/or tracks to walk inside and/or on the surface to explore space from the surface of our "Godbass Artificial Planet in Space (GAPS)". Also using temporary electro-magnetised surfaces to create Artificial Gravity or Electro-Magnetic field of attraction and/or attachments with "Godbass Artificial Planet in Space (GAPS)" in indoor and outdoor. These Electro-magnet paths indoor and/or outdoor of "Godbass Artificial Planet in Space (GAPS)" shall help humans to walk and move upright with foot grips on the floors and materials shall be moved from one place to other place safely. Usually, there is no gravity in space; hence, the humans and materials fly. So, this Electromagnetic path ways, footwear, gloves, etc,. shall help certain extent to the astronauts staying in "Godbass Artificial Planet in Space (GAPS)".

d) On the each segments surface and/or Outer Core Segments surfaces of "Godbass Artificial Planet in Space (GAPS)", the energy efficient immortal ever living or at least long living light weight solar panels or other efficient method to produce electricity from light/dark and/or heat and/or solar system and/or solar panels are placed to convert dark and/or light and/or solar energy to electricity to power the "Godbass Artificial Planet in Space (GAPS)" to make it move by self and/or rotate by self and/or other necessary power operations such as lighting, powering equipment, etc. and/or electricity power storage for future use. The rewinding and/or retractable on all the core segment's surfaces shall be better.

e) The necessary communication devices such as antennas will be placed on the each segments and/or Outer Core Segments surfaces of “Godbass Artificial Planet in Space (GAPS)”. This will help to multiple ways communicate with “Godbass Artificial Planet in Space (GAPS)” and planet Earth & space Multiverses.

f) The necessary telescopes and/or microscopes will be fitted at necessary location in indoor and/or on outdoor the surfaces of “Godbass Artificial Planet in Space (GAPS)” to research and/or explore space multiverses in detail.

g) The “Godbass Artificial Planet in Space (GAPS)” is Multi Segmented assembly with many cores like Planet Earth underground core layers. The “Godbass Artificial Planet in Space (GAPS)” is Design and Build with various Core Segments and Purposes. The Major Core Segments are Centre Core Segments, Inner Core Segments, Middle Core Segments and Outer Core Segments. The Segments and Cores can be any shape, any size, any materials, any colours, etc., Here; Spherical Globe and/or Bubble shape of Segments and Cores are using to follow the Nature of Multiverses Planets and Moons. The Details of Cores and Segments are detailed as follows.

h) **Centre Core Segments:** Figure 1A show the Stage 1 Foundation Centre Core Segments look upon completion. In Figure 1B shows the Centre Core Segments are indicated in Blue Colour. Centre Core Segments are a Core important Structure to hold the entire Core Segments of “Godbass Artificial Planet in Space (GAPS)”, that is other Core Segments built and/or developed on this. Centre Core Segments are the foundation of “Godbass Artificial Planet in Space (GAPS)”. Centre Core Segments are brought from Planet Earth to Space by various segments and assembled by various Docking Methods. Centre Core is with various Segments attached and assembled in space and can operate by self in space while detached that means undocked in space. In this Segments of Centre Core of “Godbass Artificial Planet in Space (GAPS)”, the Gyroscopic and/or Liquid Balancing and/or any other suitable stability balancing mechanism(s) is/are placed to keep and maintain the balance of “Godbass Artificial Planet in Space (GAPS)” and also Electromagnetic Production Mechanism plant to create artificial magnetic fields from electricity using solar and/or Light/dark Energies to create artificial Gravity and/or attraction to hold the humans stand and/or sit upright there and all in places respectively. The Centre Core Segments are used to store liquids such as Water, Fuels, etc., as per requirements and needs. Centre Core Segments itself can be one and/or multiple layers as required and designed. External surfaces of Centre Core Segments are fitted with Solar panels and/ or other suitable to Generate Electricity from solar light/dark and storage to

independently energize Centre Core Segments to Operate independently while separated by undocking in space.

i) **Inner Core Segments:** Figure 1A show the Stage 2 Inner Core Segments look upon completion. Figure 1C shows the Inner Core Segments are indicated in Red Colour. Inner Core Segments are outer layer of Centre Core segments. Inner Core Segments surround the Centre Core Segments. Inner Core Segments are built on the Centre Core Segments. Inner Core Segments holds the Middle Core Segments. Inner Core Segments are also brought from Planet Earth to Space by various segments and assembled by various Docking Methods. Internal Space in Inner Core Segments of "Godbass Artificial Planet in Space (GAPS)", can be used to store for the Dwellers, Astronauts, Tourists, Researches needed food, cloths, Drinking Water, Sanitary Wastes, Oxygen Storage, Hydrogen Storage, Fuel Cell Plants, Mechanical & Electrical Plants, Nuclear Power Plants (Optional), Computer Centre, Control Rooms, Artificial Intelligence self-learning Humanoid Robots and/or Other Robot Resting and Charging Places, etc. Inner Core Segments itself can be one and/or multiple layers as required and designed. External surfaces of Inner Core Segments are fitted with Solar panels and/ or other suitable to Generate Electricity from solar light/dark and storage to independently energize Inner Core Segments to operate independently while separated by undocking in space.

j) **Middle Core Segments:** Figure 1A show the Stage 3 Middle Core Segments look upon completion. Figure 1D shows the Middle Core Segments are indicated in Green Colour. Middle Core Segments are outer layer of Inner Core Segments. Middle Core Segments surrounds the Inner Core Segments. Middle Core Segments are built on the Inner Core Segments. Middle Core Segments holds the Outer Core Segments. Middle Core Segments also brought from Planet Earth to Space by various segments and assembled by various Docking Methods. Middle Core Segments are Designed and Built indoor with various Rooms, Clinics, Labs and Shops to accommodate Humans for Dwelling, Lodging & Researching, for Planet Earth Species such as tree plants, animals, birds, fishes etc. to live and cultivate vegetables and livestock for foods and researches. Middle Core Segments itself can be one and/or multiple layers as required and designed. External surfaces of Middle Core Segments are fitted with Solar panels and/ or other suitable to Generate Electricity from solar light/dark and storage to independently energize Middle Core Segments to Operate independently while separated by undocking in space.

k) **<u>Outer Core Segments:</u>** Figure 1A show the Stage 4 Roof Outer Core Segments look upon completion. Figure 1E shows the Outer Core Segments are indicated in Purple Colour. Outer Core Segments are outer layer of Middle Core Segments. Outer Core Segments surround the Middle Core Segments. Outer Core Segments are built on the Middle Core Segments. Outer Core Segments are the roof of "Godbass Artificial Planet in Space (GAPS)". Outer Core Segments also brought from Planet Earth to Space by various segments and assembled by various Docking Methods. External surfaces of Outer Core Segments are fitted with Solar panels and/ or other suitable to Generate Electricity from solar light/dark and storage to independently energize Outer Core Segments to operate independently while separated by undocking in space. Also Outer Core Segments are only and mostly exposing external surfaces to solar light/dark to produce electricity by solar panels and other suitable to generate electricity is the Main Electricity Producer and Supplier for whole "Godbass Artificial Planet in Space (GAPS)". Outer Core Segments are Designed and Built indoor various Rooms, Clinics, Entertainment Facilities, Labs and Shops to accommodate Humans for Dwelling, Lodging & Researching, for Planet earth Species such as tree plants, animals, birds, fishes etc., to live and cultivate vegetables and livestock for food and research. Outer Core Segments are Designed and Built to regularly or frequently Dock and Undock Stations in all directions to receive and send various things such as food, water, fuel, human and other solid wastes, etc., and humans to and from planet Earth and another similar "Godbass Artificial Planet in Space (GAPS)". Also "Godbass Artificial Planet in Space (GAPS)" could be a destination to the satellites going from Planet Earth into the outer space and outer space to Planet Earth can be a quarantine place for Astronauts to pre-check before entering into our planet Earth. The solar panel fixed on the external surface of Outer Core Segments can be rigid and/or re-winding and/or retractable (easily open and close type). The external surface of Outer Core Segments is fixed either with Electro-magnetised materials and/or steels coated with corrosion preventive and friction withstanding to do spacewalk by humans wearing electromagnetic shoes and/or electromagnetic gloves to hold them upright and steady in stand upright, sit upright, etc. positions comfortably. Outer Core Segments are also has a Docking Station Units (Space Shuttles Docking Port) for Space Shuttles that are frequently flying to and from Planet Earth to "Godbass Artificial Planet in Space (GAPS)" and vice-versa.

l) The Indoor Rooms, Clinics, Labs, Shops, Plant Rooms, Control Rooms etc. in "Godbass Artificial Planet in Space (GAPS)" can be Design & Build in such a way that the end user humans, inhabitable and using the limited available space wisely and safely.

Brief Description of the Drawings

Fig, 1 and 1A shows Various Stages & Core Segments of “Godbass Artificial Planet in Space (GAPS)” making in Planet Earth & Assembly in Space.

Fig. 1B shows Stage 1 Foundation Centre Cores of “Godbass Artificial Planet in Space (GAPS)” Assembly in Space.

Fig. 1C shows Stage 2 Inner Cores of “Godbass Artificial Planet in Space (GAPS)” Assembly in Space.

Fig. 1D shows Stage 3 Middle Cores of “Godbass Artificial Planet in Space (GAPS)” Assembly in Space.

Fig. 1E shows Stage 4 Roof Outer Cores of “Godbass Artificial Planet in Space (GAPS)” Assembly in Space.

Fig. 2 shows The “Godbass Artificial Planet in Space (GAPS)” Cores Segments Docking and Undocking by using DOG Knot Mechanism (DKM).

5. Functional (Operational & Maintenance) Features of GAPS

a) “Godbass Artificial Planet in Space (GAPS)” generates electricity from the solar light/dark energies. This solar powered electricity is used to light “Godbass Artificial Planet in Space (GAPS)”, power the machineries, equipment and electrolysis plant. This Electrolysis of water plant produced Hydrogen Gas and Oxygen Gas. This Oxygen gas can be used to human and living beings to breathe to live indoor in “Godbass Artificial Planet in Space (GAPS)”. The human and living being exhaled carbon-di-oxide can be used to and/or given to tree plants to inhale and that tree plants exhale oxygen while doing photosynthesis to produce food for them using water and sun light. The Hydrogen gas and Oxygen gas produced by Electrolysis of Water in the plant can be used in Fuel Cells to Produce Electricity while On-board “Godbass Artificial Planet in Space (GAPS)” and while crossing dark in space at that time sun light is not available. The Water produced by Fuel Cells can be reused and recycled in Electrolysis plant to split and produce Hydrogen gas and Oxygen gas again and again. The Recycle water and Hydrogen gas and Oxygen gas stored properly and safely in storage vessels in proper storage places. The water for these purposes can be transported from planet Earth to “Godbass Artificial Planet in Space (GAPS)” at regular interval and/or while necessary based on demand and supply requirements.

b) In “Godbass Artificial Planet in Space (GAPS)” solar panel generated electricity shall be stored properly in storage devices in proper safely

maintained storage areas. This electricity can be used to generate electromagnetic field to attract materials made or using steel to create Artificial Gravity in “Godbass Artificial Planet in Space (GAPS)” to utilise by dwellers here.

c) In “Godbass Artificial Planet in Space (GAPS)” solar panel and/or Fuel Cell and/or Nuclear Power Plant and/or other means of Electricity Generated and stored can be used to do Indoor Artificial Climate Conditioned Room Spaces in “Godbass Artificial Planet in Space (GAPS)” Indoor Rooms, Storage Places, Labs and necessary essential places. This ensures the comfortable and clean indoor environment and maintains pressure indoors in “Godbass Artificial Planet in Space (GAPS)”. Climate Condition equipment and Machineries pre-installed in segments of relevant Cores shall be made installed operated tested and then transported to “Godbass Artificial Planet in Space (GAPS)” for Docking and Function (Operation).

d) “Godbass Artificial Planet in Space (GAPS)” shall be provide with proper propulsion system to make itself rotate and/or move to one place to another according to the control Instruction / Direction commands from Planet Earth and/or Self-adjust by self-learning deep learning Artificial Intelligence Mechanism.

6. Applications & Uses of GAPS

a) “Godbass Artificial Planet in Space (GAPS)” can be a space tourist attraction for those space enthusiasts willing to enjoy the real space experiences and do physical space experiments.

b) From “Godbass Artificial Planet in Space (GAPS)”, various space changes and/or alteration and/or addition and/or deletions can be monitored & recorded and can monitor geographical physical changes and challenges happening in our planet Earth. Also help explore the space resources that are useful to humans living on the planet Earth.

c) “Godbass Artificial Planet in Space (GAPS)” can be used as temporary quarantine station for those astronauts travel to and return from other planets and moon can be temporarily made to stay and examined fit prior to return to planet Earth.

d) “Godbass Artificial Planet in Space (GAPS)” can be used as material and fuel storage and transfer station to outer space and transport satellites. Transport satellites are satellites that are orbital satellites that are travel between Planet Earth Orbit to and from Moon and/or other planet orbits. These transport satellites does not enter into the planet earth atmosphere and/or land in Planet Earth or Moon or Other planets. These transport satellites only transport humans and/or living beings and/or materials and/or machineries and equipment to and from satellites to satellites and/or between “Godbass Artificial Planet in Space (GAPS)” and “Godbass Artificial Planet in Space (GAPS)” and/or from satellites to “Godbass Artificial Planet in Space (GAPS)”, vice versa. This Transport satellites are similar to point to point expresses from Planet Earth Orbit Permanently Stationed “Godbass Artificial Planet in Space (GAPS)” to Moon and/or Other Plant Orbit Permanently Stationed “Godbass Artificial Planet in Space (GAPS)” and/or satellites. The Local Satellites and/or shuttles shall travel from planet Earth surface to Planet Earth Orbit Permanently Stationed “Godbass Artificial Planet in Space (GAPS)”. The another Local satellites and/or shuttles travel to and from Moon and/or other Planets surface to Moon and/or Other Plant Orbit Permanently Stationed “Godbass Artificial Planet in Space (GAPS)” and/or satellites. In this order the Space Transportation is possible and safe to transport Human Astronauts, and/or transport rare minerals and resources from moon and/or other planets to Planet Earth.

7. Advantages

a) “Godbass Artificial Planet in Space (GAPS)” shall help control the space infected humans and living beings by space travel Astronauts if any and/or living beings and/or materials can be pre-tested in orbit itself and ensured for enter safely into Planet Earth.

b) “Godbass Artificial Planet in Space (GAPS)” shall be a resting place prior to longer journey by space travel Astronauts.

c) “Godbass Artificial Planet in Space (GAPS)” shall be function as re-fuelling and/or transfer fuelling station to satellites in space.

d) “Godbass Artificial Planet in Space (GAPS)” shall be function as space or other planet material transfer station from one satellite to another and/or many.

e) Design, Build, Operate and Maintain the “Godbass Artificial Planet in Space (GAPS)” shall brain drain the Intellectuals, Creates many more Employments to humans in Planet Earth, Paves way for various new Businesses relevant to

SAISET (Space, Artificial Intelligence, Science, Engineering and Technologies).

f) Above all, Creation, Design, Build, Operate and Maintain the "Godbass Artificial Planet in Space (GAPS)" by humans in Planet Earth shall make Planet Earth Humans will become a "Supreme Power" at-least in our Solar Planet System by controlling natural resources in moon and /or other our near planets.

8. Potential and Future of GAPS (GAPS Trillion$ SAISET)

a) Upon Successful Design, Built, Operate, and Maintain the "Godbass Artificial Planet in Space (GAPS)", the planet Earth humans can expand to create Artificial verse(s), Artificial Universe(s), Artificial Multiverse(s) and Beyond Similar to and/or advanced than "Godbass Artificial Planet in Space (GAPS)".

b) While Designing, Building, Operate, and Maintain the "Godbass Artificial Planet in Space (GAPS)" as a Project, shall pave ways for various researches, Inventions, Innovations, space exploration thoughts and ideas, truths about Science, advancement in Engineering and Technologies. This will give very potential benefits to humans and Planet Earth. Also this paves way for new business ideas and growth to invest and get returns in multi Trillion (Dollar) Currency Markets.

c) "Godbass Artificial Planet in Space (GAPS)" will make travel among and/or between to and from satellites, space planets, moons and planet Earth.

d) "Godbass Artificial Planet in Space (GAPS)" will pave ways to form Integral Government in Space for humans in Planet Earth.

e) "Godbass Artificial Planet in Space (GAPS)" will give another dimension of experience to humans and living beings in planet earth in space "Godbass Artificial Planet in Space (GAPS)".

f) In case of any exigencies and/or emergencies by Deluge (Pralayam in Tamil), that means, the greatest disaster to whole planet Earth by Floods and/or Fire and/or other means, the Planet Earth Humans and Spices can be moved to "Godbass Artificial Planet in Space (GAPS)" and once planet Earth turn to normal, those humans and species can be brought back to Planet Earth for restart a new life in new era of Planet Earth. "Godbass Artificial Planet in Space (GAPS)" is a precautionary measure in this regard.

9. Conclution

a) We, as inventors know this is not easy task to Concept, Design, Build, Operate, Maintain “Godbass Artificial Planet in Space (GAPS)” by any individuals, but this is possible by most likeminded humans in all internationals in planet earth can make this happen in real life. Hence, we took the first step of initiation to do the Creation to Design, Build, Operate and Maintenance of “Godbass Artificial Planet in Space (GAPS)” by planet earth’s humans by using humans developed and made modern Space, Artificial Intelligence, Science, Engineering and Technologies (SAISET).

b) Together we can Create Design, Build, Operate and Maintain “Godbass Artificial Planet in Space (GAPS)”.

c) We All WIN & WIN-WIN. The Best Wishes from Sri.Dhnasekaran Basker (Mechanical Engineer), Godbass Srivathshan (Electrical with Eco Design & Electronics Engineer) & Govindaraj Selvi (Computer Science Engineer), WIN International Networks, Singapore.

Claims

1. “Godbass Artificial Planet in Space (GAPS)” is as a whole is originated in Sri. Dhanasekaran Basker, Hence, Sri. Dhanasekaran Basker is the owner of “Godbass Artificial Planet in Space (GAPS)” Concepts, Design, Build, Operate, Maintain, Addition & Alteration, Modify, Innovate further and Expand.

2. The Structural Features Described and Disclosed in “Godbass Artificial Planet in Space (GAPS)” Abstract, Description, Drawing Figures etc., are original Invention of Sri.Dhanasekaran Basker is claiming the ownership.

3. The Functional Features Described and Disclosed in “Godbass Artificial Planet in Space (GAPS)” Abstract, Description, Drawing Figures etc., are original Invention of Sri.Dhanasekaran Basker is claiming the ownership.

4. Sri.Dhansekaran Basker claims, “Godbass Artificial Planet in Space (GAPS)” is Copyright of Sri. Dhanasekaran Basker, hence including officials, any and/or all and/or Part of “Godbass Artificial Planet in Space (GAPS)” should not be copied, photocopied, reproduced, exchanged, and communicated in any and all means without the written permission of Sri.Dhanasekaran Basker. All Rights Reserved.

5. “Godbass Artificial Planet in Space (GAPS)” is Patent in Process / Progress of Sri. Dhanasekaran Basker.

6. Contact “Godbass Artificial Planet in Space (GAPS)” Inventor Sri. Dhanasekaran Basker through his email and/or mobile number for official purposes.

7. Sri Dhanasekaran Basker claims all rights regarding “Godbass Artificial Planet in Space (GAPS)” all over planet Earth and Space.

8. Sri. Dhansekaran Basker Claims and exempts Patent Officials to Publish the Abstract and Figure to Publish (Figure 1) in Government Journals and Gazettes to notify public about the invention “Godbass Artificial Planet in Space (GAPS)”. All others to submit “Non-Disclosure Agreement” to maintain Goodwill and Faith.

9. Sri.Dhanasekaran Basker, as Originator and Inventor Claims and Reserves all the Right to all Design and Develop, Build, Operate and Maintain regarding the “Godbass Artificial Planet in Space (GAPS)”
