(54) Title: METHOD AND SYSTEM FOR CUSTOMISING A SURF SESSION

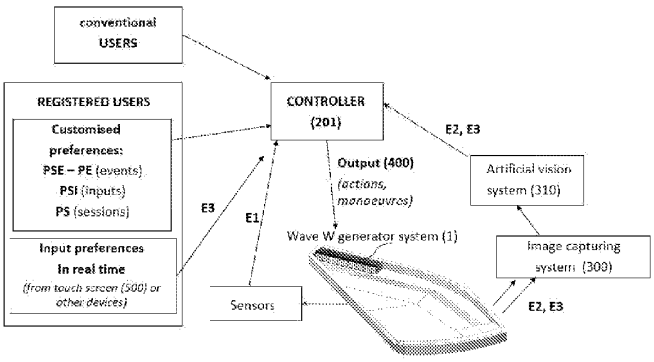

FIG. 2A

(57) Abstract: Method and system for customising a surf session running in a facility provided with a wave W generator system (1) controlled by a controller (201). The method includes defining a set of customised preferences, detecting events and user input during the surf session and modifying the programming of the ongoing session based on the customised preferences, generating an output (400) to act on the wave generator system (1) to reflect those preferences. The invention allows customisation of the surf session in real time, based on a combination of detected events, automatic decisions of the controller (201) and surfer preferences. These preferences may be modified during the surf session, improving the degree of customisation of the surf session compared to conventional control systems.
