CLAIMS

1. An article support for wallpaper for use in attaching an article, which is used by being attached to a wall, to wallpaper adhered to the wall, comprising:

an anchor sheet that is peelably adhered to wallpaper having an uneven surface,

wherein the anchor sheet comprises a substrate and a pressure sensitive adhesive layer formed on one side of the substrate,

wherein the pressure sensitive adhesive layer comprises re-peelable pressure sensitive adhesive having such an adhesive strength that does not cause cohesion failure to the pressure sensitive adhesive layer when the anchor sheet is removed from the wallpaper, and

wherein the substrate is made of paper material having a fine uneven surface resulting from a fiber raw material.

2. An article support for wallpaper for use in attaching an article, which is used by being attached to a wall, to wallpaper adhered to the wall, comprising:

an anchor sheet that is peelably adhered to wallpaper having an uneven surface,

wherein the anchor sheet comprises a substrate and a pressure sensitive adhesive layer formed on one side of the substrate,

wherein the pressure sensitive adhesive layer comprises re-peelable pressure sensitive adhesive and has a thickness of 10 to 50 μm, and

wherein the substrate is made of paper material having a fine uneven surface resulting from a fiber raw material.

3. The article support for wallpaper according to claim 1, wherein a thickness of the pressure sensitive adhesive layer is 10 to 50 μm.

4. The article support for wallpaper according to any one of claims 1 to 3, wherein the substrate comprises Japanese paper.

5. The article support for wallpaper according to any one of claims 1 to 4, wherein the pressure sensitive adhesive of the pressure sensitive adhesive layer is acrylic pressure sensitive adhesive.

6. The article support for wallpaper according to any one of claims 1 to 5, further comprising a base plate that allows an article such as a hook, a film mirror, an accessories case, or a picture frame to be attached to a surface of the anchor sheet, and being configured to fix the base plate via the anchor sheet to the wallpaper,

wherein the base plate comprises an adhesive means provided on a back side thereof, the adhesive means being configured to be adhered to the anchor sheet.

7. The article support for wallpaper according to claim 6, wherein the adhesive means has an adhesive strength of 3 N/20 mm or more relative to the substrate.

8. The article support for wallpaper according to claim 6 or 7, wherein the adhesive means comprises a double-sided pressure sensitive adhesive tape.

9. The article support for wallpaper according to any one of claims 6 to 8, wherein the base plate is made of a material that does not cause deformation such as deflection when the article is attached.

10. The article support for wallpaper according to claim 9, wherein the base plate is formed of a resin sheet.

11. The article support for wallpaper according to claim 9, wherein the base plate is formed of wood.

12. The article support for wallpaper according to claim 9, wherein the base plate is formed of metal.

13. The article support for wallpaper according to any one of claims 6 to 12, wherein the base plate is printed with a pattern, color, or the like.

14. An anchor sheet for attaching an article such as a hook, a film mirror, an accessories case, or a picture frame to wallpaper having an uneven surface,

wherein the anchor sheet is adhered to the wallpaper at a position at which the article is to be attached, and is interposed between the article and the wallpaper,

wherein the anchor sheet comprises a substrate and a pressure sensitive adhesive layer formed on one side of the substrate to be adhered to the wallpaper,

wherein the pressure sensitive adhesive layer comprises re-peelable pressure sensitive adhesive having such an adhesive strength that does not cause cohesion failure to the pressure sensitive adhesive layer when the anchor sheet is removed from wallpaper, and

wherein the substrate is made of paper material having a fine uneven surface resulting from a fiber raw material.

15. An anchor sheet for attaching an article such as a hook, a film mirror, an accessories case, or a picture frame to wallpaper having an uneven surface,

wherein the anchor sheet is adhered to the wallpaper at a position at which the article is to be attached, and is interposed between the article and the wallpaper,

wherein the anchor sheet comprises a substrate and a pressure sensitive adhesive layer formed on one side of the substrate to be adhered to the wallpaper,

wherein the pressure sensitive adhesive layer comprises re-peelable

pressure sensitive adhesive and has a thickness of 10 to 50 μm, and

wherein the substrate is made of paper material having a fine uneven surface resulting from a fiber raw material.

16. The anchor sheet according to claim 14 or 15, wherein the substrate comprises Japanese paper.
