Patent Claims

1. A clipboard (28) ~~realised~~ designed as a ~~base~~ support (29) for a sheet of paper (30) ~~and~~ with ~~a~~ ~~fastening~~an attachment (29a) ~~therefore~~for it, wherein the ~~base~~ support (29) is provided with at least one, preferably with two RFID transponders (18), comprising a marking (30a) on the ~~base~~ support (29), ~~which indicates,~~indicating precisely where ~~exactly~~ the sheet of paper is to be placed, as well as at least one sheet of paper (30) with ~~a~~ an RFID transponder (~~28~~18), wherein a respective RFID transponder (18) ~~each~~ of the ~~base~~ support (29) and of the sheet of paper (30) are arranged ~~so as to be close to each other for~~in communication, proximity with each other when the sheet of paper is fixed ~~to~~ on the ~~fastening, characterised~~attachement, characterized in that the ~~base~~ support (29) ~~includes~~ comprimises a plurality of switches (15), which ~~are~~ preferably are arranged in a matrix, ~~whereas~~ wherein the sheet of paper (30) is provided with various information, instructions and/or ~~choice~~ selection variants (27a), as well as with ~~a~~ ~~number of~~several marking fields (15a), which each are ~~respectively arranged at the locations of~~where the switches (15) of the clipboard (28), are located when the sheet of paper (30) is fastened ~~on~~ to the marking (30a) of the ~~base~~ support (29).

2. The clipboard (28) according to claim 1, ~~characterised~~ characterized by at least one LED (31), which can ~~indicate~~ display feedback for initiated actions ~~performed~~.

3. The clipboard (28) according to claim 1 or 2, ~~characterised~~ characterized in that the switches (15) on the ~~base~~ support (29) are ~~marked~~ labeled or ~~arranged~~ hidden behind a surface.

4. The clipboard (28) according to one of the preceding claims, ~~characterised~~ characterized by a port (9), which ~~may~~ can be a wireless interface, with which ~~the recorded~~acquired data ~~is~~ can be transmitted to a computer (10).

5. The clipboard (28) according to one of the preceding claims, ~~characterised~~ characterized in that the sheet of paper (30) is part of ~~an accumulation~~collection of prefabricated sheets of paper (30).

6. The clipboard (28) according to one of the preceding claims, ~~characterised~~ characterized in that each switch (15) is ~~realised~~ designed as a push-button.
