(54) Title: SYSTEM FOR MEASURING AND REPORTING A CONDITION OF EQUIPMENT

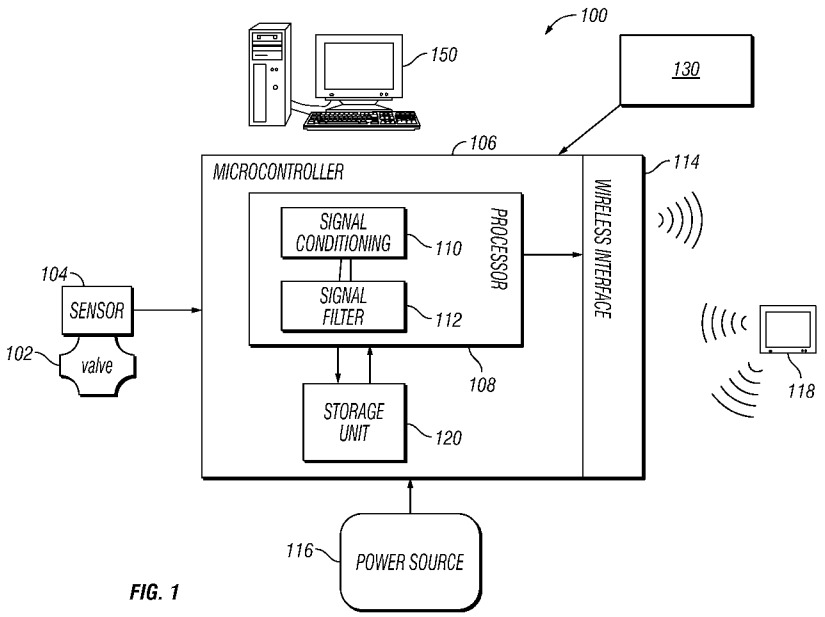

FIG. 1

(57) Abstract: A system for measuring and reporting conditions of equipment comprises a sensor to measure a condition of the equipment. The sensor communicates with a processor in communication that receives the signal from the sensor and converts the signal to data. A data storage device in communication with the processor stores the measurement data. Also included is a wireless communication interface in communication with the processor for wireless communicating the measurement data.
