

**AN INK CARTRIDGE REFILLING SYSTEM AND A METHOD OF REFILLING
AN INK CARTRIDGE**

ABSTRACT

An ink cartridge refilling system and method of refilling an ink cartridge is disclosed. The system (10) includes a syringe (18, 102), a receiving portion (24, 106) and
5 connecting means (20, 22, 104) for connecting the syringe (18, 102), in fluid communication with the receiving portion (24, 106) and thereby, in use, with an ink cartridge (12) to be refilled with ink. The arrangement is such that operation of the syringe (18, 102) causes ink to flow through the connecting means (20, 22, 104) and into an ink cartridge (12) received, in use, in the receiving portion (24, 106).
