ABSTRACT

A LINTEL AND STIFFENER

A lintel 101,102,103 for supporting building units over an opening of a wall is disclosed herein. In a preferred embodiment 101,102, the lintel 101,102 comprises a base plate 103 and two side plates 106,103 integrally connected to the base plate 106 to define an elongate and substantially hollow section

109 for supporting building units. Each of the side plates 103,106 includes deformations 101,102,104, adapted to reinforce the strength and stiffness of the lintel 102.
