(54) **Title:** ADDITIVE

(57) **Abstract:** A method of preparing a liquid fuel additive comprising the partial transesterification with ethanol of a vegetable oil blend consisting of 58-64% palm oil, 12-18% soya oil, 16-22% peanut oil and 5-9% canola oil, all percentages being by weight. The addition of the additive to a liquid fuel results in a fuel that burns with considerably reduced emissions.
