## Abstract

### Short Message Gateway, System and Method of Providing Information Service for Mobile Devices

An information service for mobile devices, and a short message service gateway (120), comprise: a short message interfacing component (126, 127) for receiving/sending short messages from/to outside of the short message service gateway (120); a short message service engine (121), responsive to a request for an information service included in a short message received by the short message interfacing component, for requesting the information service from at least on application server (110) and receiving a result of the information service, and then sending the result of the information service back to the short message interfacing component in the form of a short message.
