CLAIMS

1. A confirming method of membership, comprising:

identifying, under a visible light, a physical arrangement of whole diamonds arranged in a single product;

identifying, under ultraviolet radiation, a form of a blue fluorescence equal to or stronger than strong blue in the whole diamonds; and

confirming the membership if the form of the blue fluorescence equal to or stronger than strong blue coincides with the physical arrangement of the whole diamonds.

2. An ornamental device comprising:

a support of a product; and

diamonds fixed to the support and arranged without forming a letter or letters or a pattern,

the whole diamonds on the support having a unified blue fluorescence equal to very strong blue when exposed to ultraviolet radiation.
