METHOD AND SYSTEM FOR AUTOMATED WARRANTY REGISTRATION

ABSTRACT

The present invention includes methods and systems of automated warranty registration. The method comprises receiving information of a transaction for product and/or service at a warranty registration module, wherein the product and/or service is associated with one or more warranties; obtaining information of a customer that has participated in the transaction; and registering the one or more warranties by sending the information of the transaction of product and/or service and the information of the customer to a party that handles warranty registration and/or management.
