

【ABSTRACT】

EYELASH MASCARA DEVICE EQUIPPED WITH HEATING ELEMENT,
AND METHOD FOR CONTROLLING SAME

5 The present invention relates to an eyelash mascara
device equipped with a heating element and a method for
controlling the same and, more particularly, to an eyelash
mascara device equipped with a heating element, and a
method for controlling the same, the eyelash mascara device
10 being characterized in that the heating element is mounted
within mascara such that the heating element is displayed
to the outside in a state most suitable for use so that eye
makeup can be performed under a heating-temperature
condition most suitable for eyelashes, and the eyelash
15 mascara device is automatically powered off after a
predetermined period of time, thereby preventing eyelashes
from being heated for a long time.
