BRIEF SUMMARY

[0003a] According to an aspect of the present invention, there is provided a camera system for use with a weapon, comprising: a display; and a camera operatively coupled to the display, wherein, during a set-up procedure, a camera view shown on the display is used to acquire a same aim point as the weapon, and wherein, after the set-up procedure, the camera view does not use a weapon sight of the weapon when acquiring a target.

[0004] Systems, apparatuses, and methods provide weapon sighted cameras substantially as illustrated by and/or described in connection with at least one of the figures, as set forth more completely in the claims.

[0005] Various advantages, aspects and novel features of the present disclosure, as well as details of an illustrated embodiment thereof, will be more fully understood from the following description and drawings.
