ABSTRACT OF THE DISCLOSURE (FIG. 4)

"DISK DRIVE HAVING HOLDING MEMBER TO SECURE CONTROL  
CIRCUIT BOARD EXTERNALLY MOUNTED TO DRIVE CASING"

5

A disk drive includes a casing having a mount  
surface. The casing houses a disk-shaped recording  
medium, a drive motor which supports and rotates the  
recording medium, a head which performs information  
10 processing for the recording medium, a head actuator  
configured to movably support the head and move the  
head relative to the recording medium. A control  
circuit board is arranged to overlap the mount surface  
of the casing. A holding seal is adhered to the  
15 control circuit board and the casing, covering a  
peripheral portion of the control circuit board to  
press the peripheral portion to the mount surface.
