ARTICLE OF CLOTHING HAVING MAGNETIC FASTENING ASSEMBLIES

Abstract

An article of clothing, such as a dress shirt, blouse, coat, jacket, or vest, includes a sheet of material forming a body portion. First and second plackets are formed along respective first and second end portions of the sheet of material. First and second magnetic elements, each being encased in an encasement, are secured inside first and second pockets, respectively, such that positions of the plurality of second magnetic elements correspond to positions of the plurality of first magnetic elements.
