(54) **Title:** MOSQUITO TRAP

FIG. 1

(57) **Abstract:** The application provides an apparatus for attracting mosquitoes. The apparatus includes one or more mosquito-breeding containers, a purging container with a purging pump, and a purging tube. In particular, the breeding container includes a water outlet that is provided at a bottom of the breeding container. The purging pump is provided for transferring water out of the purging container. The purging tube is connected to the purging container and to the breeding container water outlet of the breeding container. The purging tube is provided for allowing water with any egg or larvae to flow, by gravitational force, from the breeding container to the purging tube and to the purging container. The purging pump is further provided with a predetermined low water operating level, which is positioned below the purging tube.
