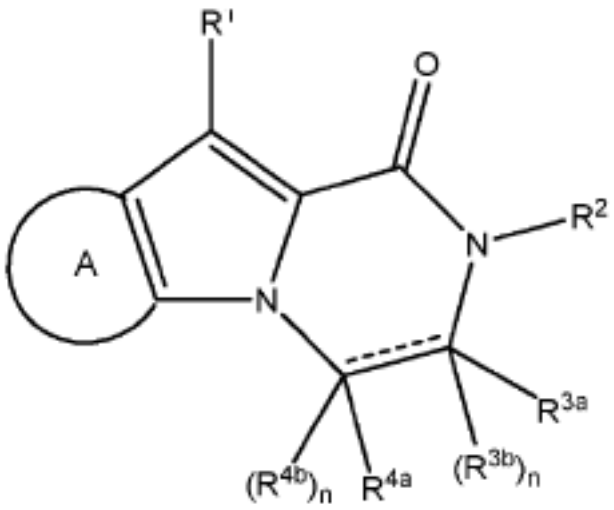
TRICYCLIC COMPOUNDS AND THEIR USE AS PHOSPHODIESTERASE INHIBITORS

Abstract

The present invention is directed to compounds of Formula I:



Formula I

or a pharmaceutically acceptable salt thereof, wherein the substituents A, R^1 , R^2 , R^{3a}, R^{3b}, R^{4a}, R^{4b} and n are as defined herein. The inventions also directed to pharmaceutical compositions comprising the compounds, methods of treatment using the compounds and methods of preparing the compounds.
