

TITLE OF INVENTION: A RETRACTABLE BED SYSTEM

ABSTRACT

The present invention relates to a retractable bed system comprising:

- (a) a housing having a first compartment and a second compartment, a retracting mechanism being mounted within said second compartment, said housing being mounted onto the ceiling of a room;
- (b) a platform, comprising a framework, a plurality of top plates and bottom plates, detachably mounted within said first compartment, being suspended to a rotating shaft of said mechanism such that said platform is retractable upward or downward from the ceiling; and
- (c) a pair of guiding track vertically mounted onto the mounting wall such that the retracting movement of the platform is guided against said mounting wall.
