(74) Agents: REED, T., David et al.; The Procter & Gamble Company, 5299 Spring Grove Avenue, Cincinnati, OH 45217 (US).		Published With international search report.

(54) Title: DISPOSABLE ABSORBENT ARTICLE WITH PULL OUT WINGS FIXED IN DELIVERY POSITION

(57) Abstract

The present invention relates to disposable absorbent articles (20) such as sanitary napkins (20), panty-liners and incontinence pads that have side wrapper elements (50), also called wings (50) for folding around the side edge of the article (20). The components are provided in a delivery position in which each of the side wrapping elements (50) is folded upwards onto the wearer facing surface (38) of the absorbent article (20) and back onto itself. In this position the side wrapping elements (50) can be unfolded by pulling the outermost edge of each side wrapping element (50) in a transverse direction. The side wrapping elements (50) are maintained in the delivery position by a separable delivery attachment means (60), preferably provided by crimping, between the wearer facing side (38) of the side wrapping elements (50) and the absorbent article (20).
