(54) Title: METHODS FOR TRANSMITTING AND RECEIVING DATA AND COMMUNICATION DEVICES

(57) Abstract: A method for transmitting data from a first communication device to a second communication device, comprising generating a message, wherein the message comprises data to be sent to the second communication device, a source address and a destination address, associating a first address of the first communication device as the source address for the message, associating a first address of the second communication device as the destination address for the message, determining a second address of the first communication device, determining a second address of the second communication device, replacing the first address of the first communication device with the second address of the first communication device as the source address for the message, replacing the first address of the second communication device with the second address of the second communication device as the destination address for the message, and sending the message.
