ABSTRACT

Embodiments of the present disclosure disclose a search method and apparatus, and an electronic device. A specific implementation of the method includes: displaying a first search control in a product information interface; displaying a second search control in the product information interface, where the second search control is obtained based on the first search control; and displaying second goods information in the second search control, where the second product information has an association relationship with first product information, and the first product information is determined based on a product on which a user of the product information interface has performed a preset operation.
