# A Cover Assembly

## Abstract

A cover assembly 10 is disclosed for covering an hole 12 extending through an aircraft skin 9. The cover assembly 12 includes a cover 14 covering the opening on the outer surface 9A of the aircraft skin 9 and a c-shaped bracket 22 that extends across the hole 12 on the inner surface of the aircraft skin 9. The cover assembly 12 also includes two bolts 18 for connecting the cover 14 and the c-shaped bracket 22. The bolts 18 being capable of moving the cover 14 and the c-shaped bracket 22 toward each other for locking engagement of the aircraft skin 9 between the cover 14 and the c-shaped bracket 22.
