ABSTRACT

GOLF TEE HOLDER

A golf tee holder for use with a mat having a hole therein. The golf tee holder comprises a main body portion for insertion into the hole, and a collar extending outwardly from the main body portion adjacent a concave top of the main body portion. The collar is for locating immediately adjacent or on the mat when the main body portion is inserted in the hole. The main body portion is generally cylindrical and has an outer surface comprising at least one a saw-tooth edge extending around the main body, and a central bore extending longitudinally therethrough, the central bore having a wall with a wave-form shape.
