ABSTRACT OF THE INVENTION

BAND-TYPE DISPENSER FOR WRAP FILM

A band-type dispenser for wrap film includes a base, an endless band device, and a cutter unit. The base has a chamber in its interior, and a positioning bracket is respectively fixed at two sides of the chamber for supporting a roll of wrap film. The endless band device is disposed in the base and has at least one endless band for moving the wrap film. The cutter unit is positioned in front of the endless band device for cutting wrap film. The dispenser is automatically operated, with a cut piece of the wrap film kept flat and smooth, so a user can use it with safety and convenience.
