(54) Title: SLIDE SHOW WITH AUDIO

(57) **Abstract:** The present invention relates to devices and methods for processing data defining a still image slide show with background audio. An example system may include an optical disk player (10) (e.g., DVD player) configured to read video and audio data from one or more storage media (e.g., DVD, compact flash device and/or hard disk (450)). An example method may include presenting output signals containing data descriptive of a slide show with background audio in a mode or configuration selected by a user.
