I CLAIM:

1. A tool for the postproduction of a wall surface into exposed concrete, comprising:

a main body being an elastic element made of a water absorbing material; and

a spreading layer, covering an outside of said main body being formed with sprayed powder paste mixed with a synthetic rubber emulsion and a blended mortar with the synthetic rubber emulsion with trowels.

~~2. The tool according to claim 1, wherein said main body is an elastic element.~~

~~3. The tool according to claim 2, wherein said elastic element is made of a water absorbing material such as sponge or foam.~~

~~4~~2. The tool according to claim 1, wherein said spreading layer is made of silk or unwoven material.

3. The tool according to claim 1, wherein the spreading layer further comprises a coloration layer.

4. The tool according to claim 3, wherein the coloration comprises a cement mixed with a coloring pigment.
