(54) Title: A SYSTEM FOR MONITORING DISTRIBUTION OF TAKEAWAY BOXES A METHOD THEREOF

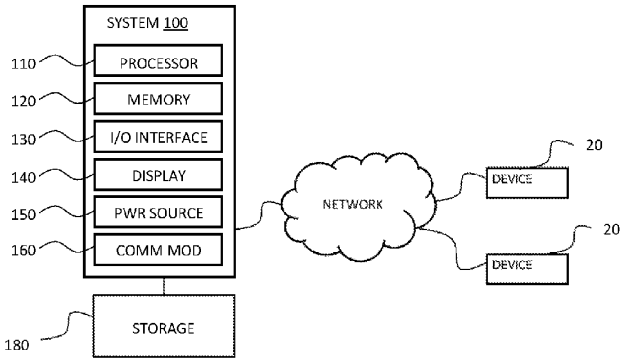

Fig. 1

(57) Abstract: A system for monitoring distribution of takeaway boxes is provided. System includes a processor, and a memory in communication to the processor for storing instructions executable by the processor, such that the processor is configured to receive at least one batch identifier identifying at least one batch of takeaway boxes transmitted from a mobile device, retrieve a batch quantity of the at least one batch of takeaway boxes based on the at least one batch identifier, receive at least one outlet identifier identifying at least one food outlet that receives the takeaway boxes transmitted from the mobile device, receive location data transmitted from the mobile device or retrieving location data of the at least one food outlet based on the outlet identifier, generate a distributed quantity of the takeaway boxes based on the quantity of the at least one batch of takeaway boxes and the location data of the at least one food outlet, such that the processor is configured to monitor the distribution of the takeaway boxes to the at least one food outlet based on the distributed quantity. Further, a method for monitoring distribution of takeaway boxes is provided.
