(71) Applicant: **KVADRAT ACOUSTICS A/S** [DK/DK];
Lundbergsvej 10, 8400 Ebeltøft (DK).

(72) Inventors: **NIELSEN, Jesper**; C/O Kvadrat Acoustics A/S, Lundbergsvej 10, 8400 Ebeltøft (DK). **CASPERSEN**,

(54) Title: BUILDING PANEL ADAPTED TO BE MOUNTED AT A CEILING OR WALL OF A ROOM AND METHOD OF MANUFACTURING SUCH BUILDING PANEL

FIG. 2

(57) Abstract: A textile (7) is extended over a framework between frame profile members (6). Each edge (8) of the textile is attached to a corresponding frame profile member by means of a tensioning profile member (9) being spring-biased into a tensioned state. Each edge of the textile is provided with a number of holding elements (11) arranged flexibly in relation to each other along the edge of the textile. Each holding element includes an engagement portion (12) for insertion into a longitudinal channel (10) of the tensioning profile member through an opening slot (13) of the channel. In the tensioned state of the textile, a tension force of the textile acts on each holding element so that a rotational moment seeks to rotate the engagement portion about a longitudinal axis of the channel and thereby forces the engagement portion of each holding element into locking engagement with the channel.
