ABSTRACT

~~The present disclosure relates to a~~An indication method includes~~, an indication apparatus, and a storage medium. The indication method is performed by a terminal, and comprises~~: determining a first message, wherein the first message ~~is used to~~ indicates a configuration parameter of joint channel estimation ~~executed by~~of a network ~~side~~ device. ~~According to the present disclosure, the starting of joint channel estimation by a network side device and a time window for executing joint channel estimation can be indicated to a terminal. The problem of being unable to indicate the starting of joint channel estimation and a time window for executing joint channel estimation to a terminal is thus solved.~~
