Claims

1. A combination of the cannabinoids tetrahydrocannabinol (THC) and cannabidiol (CBD) in a ratio of from between 20:1 to 1:20, but not 5:1 to 1:5, (THC:CBD), for use in the treatment of a gliomablastoma multiforme (GBM), wherein the treatment is to reduce cell viability, inhibit cell growth or reduce tumour volume.

2. A combination of the cannabinoids tetrahydrocannabinol (THC) and cannabidiol (CBD) as claimed in claim 1, wherein the cannabinoid content is in the range of between 5 and 100mg of the total cannabinoids present.

3. A combination of the cannabinoids tetrahydrocannabinol (THC) and cannabidiol (CBD) as claimed in claim 1 or 2, wherein the THC and CBD are present as plant extracts, as pure compounds, or a combination of the two.

4. A combination of the cannabinoids tetrahydrocannabinol (THC) and cannabidiol (CBD) as claimed in claim 3, wherein the plant extract is in the form of a botanical drug substance.

5. A combination of the cannabinoids tetrahydrocannabinol (THC) and cannabidiol (CBD) as claimed in any of the preceding claims, wherein the one or more cannabinoids are administered separately, sequentially or simultaneously to one another.

CLAIMS

1. A combination of the cannabinoids tetrahydrocannabinol (THC) and cannabidiol (CBD) in a ratio of from between 5:1 to 1:5 (THC:CBD) for use in the treatment of a brain tumour other than a gliomablastoma multiforme (GBM), wherein the cannabinoid content is in the range of between 5 and 100mg.

2. A combination of the cannabinoids tetrahydrocannabinol (THC) and cannabidiol (CBD) as claimed in claim 1, wherein the treatment of the brain tumour is to reduce cell viability, inhibit cell growth or reduce tumour volume.

3. A combination of the cannabinoids tetrahydrocannabinol (THC) and cannabidiol (CBD) as claimed in claim 1 or 2, wherein the THC and CBD are in a ratio of approximately 1:1.

4. A combination of the cannabinoids tetrahydrocannabinol (THC) and cannabidiol (CBD) as claimed in any of the preceding claims wherein the brain tumour is a glioma tumour.

5. A combination of the cannabinoids tetrahydrocannabinol (THC) and cannabidiol (CBD) as claimed in any of the preceding claims wherein the THC and CBD are present as plant extracts, as pure compounds, or a combination of the two.

6. A combination of the cannabinoids tetrahydrocannabinol (THC) and cannabidiol (CBD) as claimed in claim 5, wherein the plant extract is in the form of a botanical drug substance.

7. A combination of the cannabinoids tetrahydrocannabinol (THC) and cannabidiol (CBD) as claimed in any of the preceding claims, wherein the one or more cannabinoids are administered separately, sequentially or simultaneously to one another.
