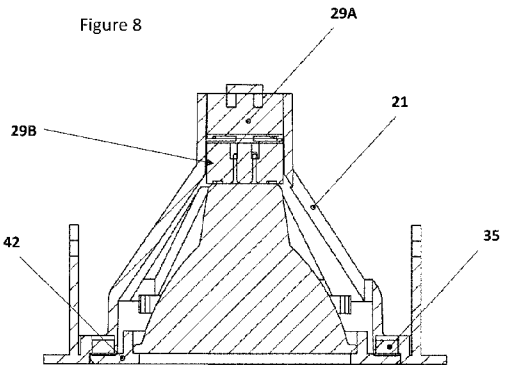
(54) Title: LIGHT CONSUMABLE HOUSING AND CHANGING SYSTEM

Figure 8



(57) Abstract: A housing (21) for holding a light consumable (22) or a mounting unit (42) on which the light consumable (22) is mounted. The housing includes at least one opening (23) for receiving the light consumable (22) and allowing transmission of light from the light consumable when mounted in the housing (21). An electrical connection means having first and second parts (29A) and (29B) provide the electric power to the mounted light consumable. A holding means further includes a first part of a magnetic means whereby a second part of the magnetic means mounted on an elongated arm which can be positioned adjacent the first part of the magnetic means and provide magnetic force at the opening so as to withdraw the light consumable or the unit on which the light consumable is mounted from within the housing.
