ANTIBODIES THAT BIND TO IL-18 AND METHODS OF PURIFYING THE SAME

ABSTRACT

Anti-IL-18 antibodies are disclosed herein, including antigen-binding portions thereof. One or more methods for isolating and purifying anti-IL-18 antibodies from a sample matrix is presented. These isolated anti-IL-18 antibodies can be used in a clinical setting as well as in research and development. Pharmaceutical compositions comprising isolated anti-IL-18 antibodies are also described.
