An Apparatus and Method for Impregnating A Fluid In-situ Into A Medium

ABSTRACT

An apparatus for impregnating a fluid into a medium, a method of impregnating a fluid into a medium and a method of leakage testing of a medium are provided. The apparatus comprises one or more main compartments each having an open face for enclosing respective portions of a surface of the medium when a rim of said each compartment contacts the surface of the medium; securing means for securing the main compartments with the rims of the respective compartments contacting the surface of the medium; and one or more conduits in fluid communication with each main compartment.
