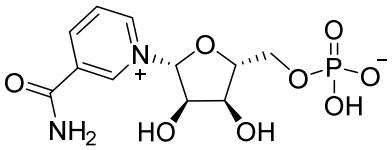
Claims:

1. A crystalline Form 1 of a compound having the structure of formula (I),



(I);

wherein the crystalline Form 1 is anhydrous and has 2θ values 20.03; 20.14; 21.83; and 25.73.

2. The crystalline Form 1 of claim 1, having 2θ values 20.03; 20.14; 21.03; 21.83; 23.08; 23.39; 25.73; and 26.59.

3. The crystalline Form 1 of claim 2, having 2θ values 7.70; 11.54; 12.64; 16.03; 18.99; 20.03; 20.14; 20.83; 21.03; 21.83; 23.08; 23.39; 25.48; 25.73; 26.59; and 29.78.

4. The crystalline Form 1 of claim 3, having 2θ values 7.70; 9.95; 11.54; 12.64; 16.03; 18.18; 18.99; 19.16; 19.44; 20.03; 20.14; 20.83; 21.03; 21.83; 22.44; 23.08; 23.39; 23.89; 24.08; 24.53; 24.68; 25.05; 25.48; 25.73; 26.08; 26.59; 27.33; 27.67; 29.78; and 29.92.

5. The crystalline Form 1 of claim 4, having an XRD pattern substantially as shown in FIG. 1, labeled Form 1.

6. A pharmaceutical composition comprising the crystalline Form 1 of any one of claims 1-5 and one or more pharmaceutically acceptable excipients.
