WO 2004/026928 A1

(54) Title: ELASTOMERIC, EXPANDABLE HYDROGEL COMPOSITIONS

(57) Abstract: Optically transparent, soft, flexible, elastomeric, expandable hydrogel compositions and ophthalmic devices such as intraocular lenses, contact lenses and corneal inlays made therefrom are described herein. The preferred hydrogel compositions are produced through the copolymerization of one or more fluoro side-chain methacrylate end-capped silicone monomers with one or more hydrophilic monomers.
