ABSTRACT

COMPOSITION FOR PROMOTING KETONE BODY PRODUCTION

An object of the present invention is to provide a novel composition for promoting ketone body production. The present invention provides a composition for use in promoting ketone body production, comprising one or more amino acid(s) selected from the group consisting of citrulline, leucine, cysteine, taurine, glutamine and aspartic acid. The composition according to the present invention may further comprise either or both of a medium-chain fatty acid and a medium-chain fatty acid ester.
