Figure 1

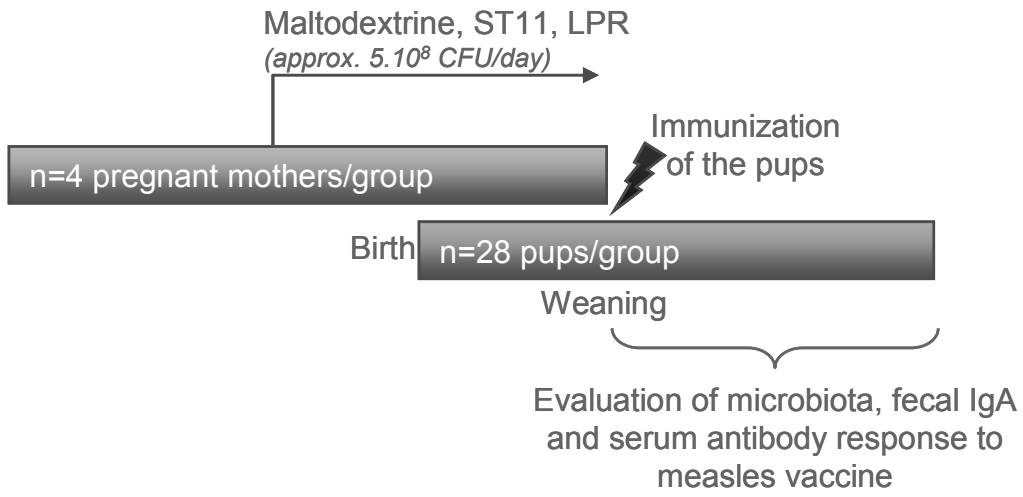

Fig. 1 : Experimental procedure (study 1)

Figure 2

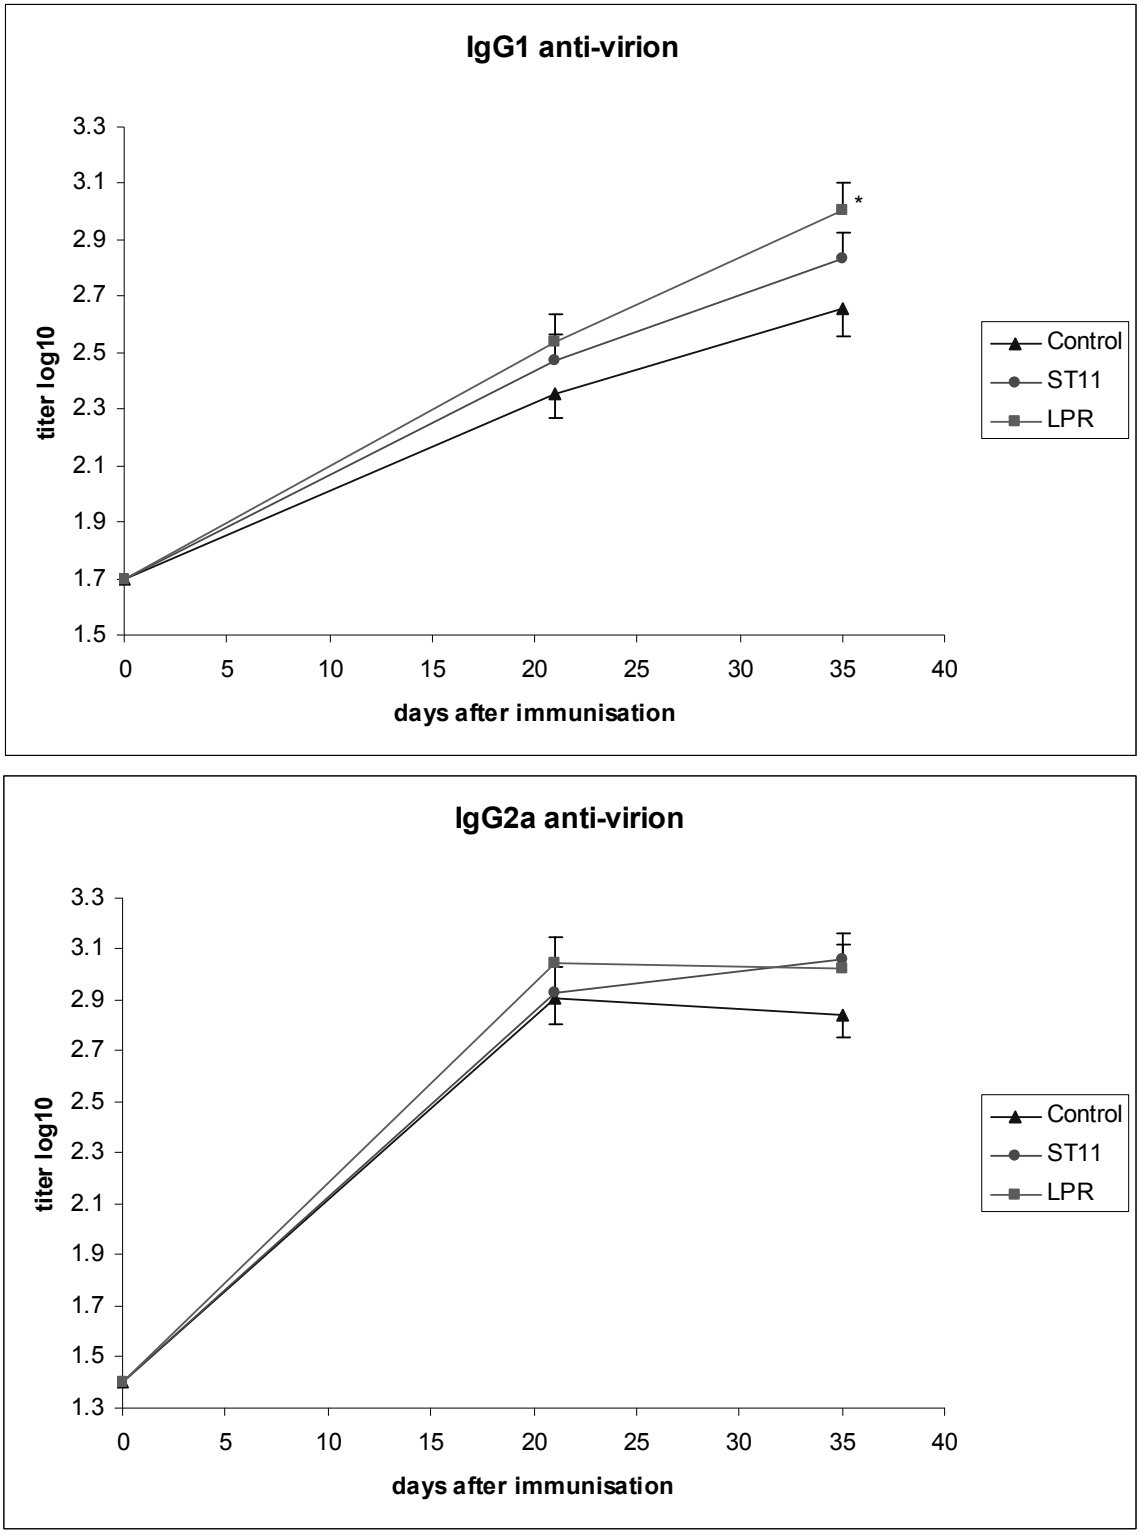

Fig 2 : Specific-measles antibody responses. Means values ± SEM. *: P=0.03 compared to control.

Figure 3

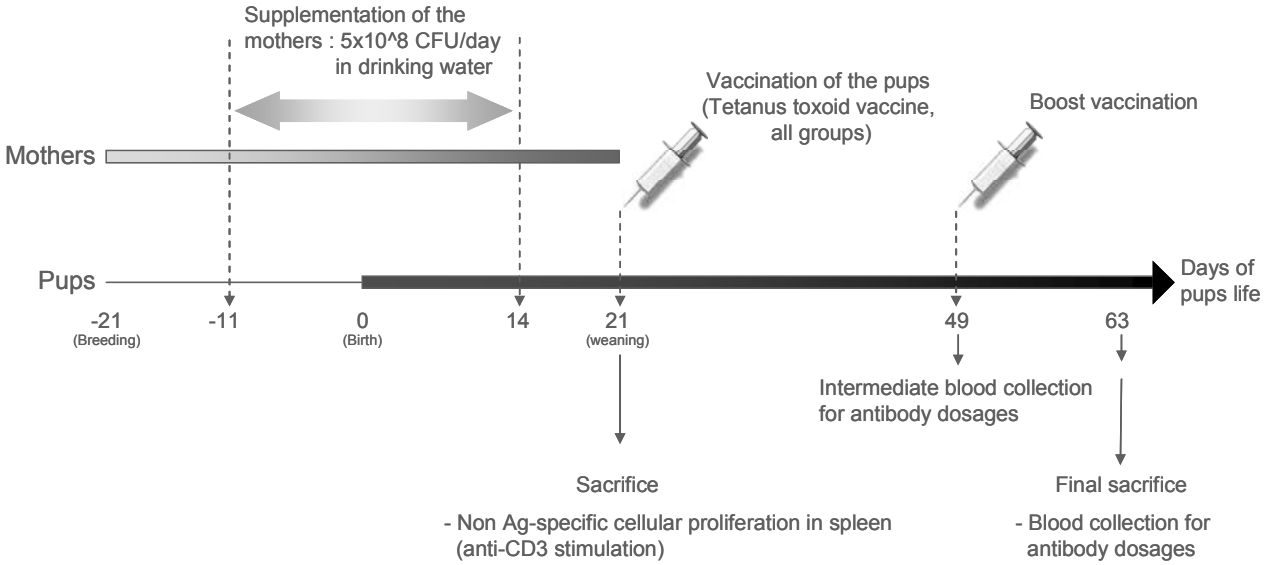

Fig.3: Experimental design (study 2)

Figure 4

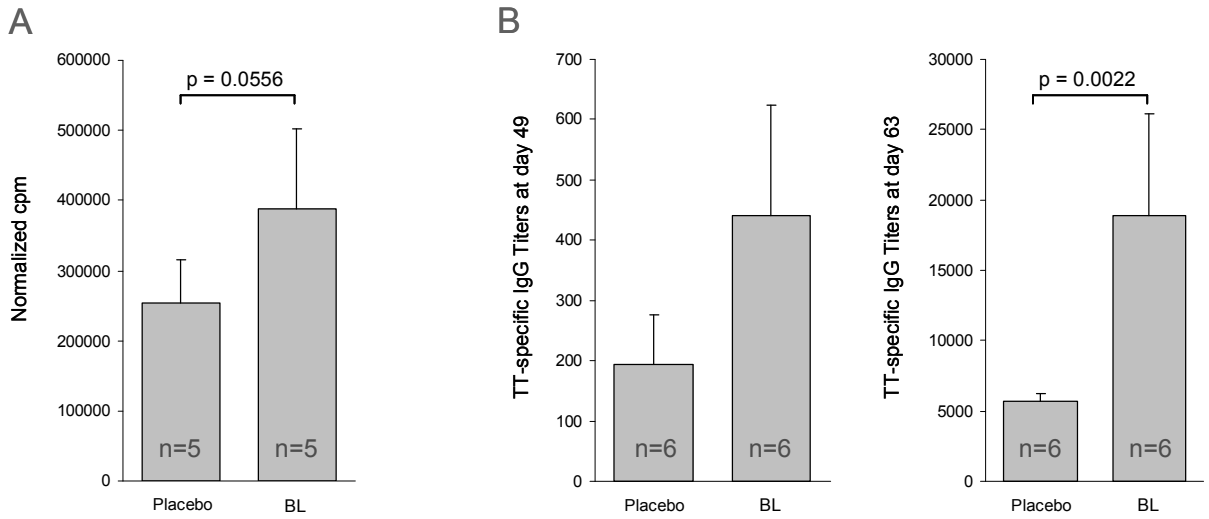

Fig. 4: Systemic immune responses. (A) non-antigen specific spleen T cell proliferation at 3 weeks. (B) anti-TT IgG antibody responses 4 weeks after the first immunization (left panel) and two weeks after the boost (right panel). Data represent medians ± standard error of the median. Number of mice per group is indicated in the columns.
