(54) Title: WINDOW PANE WITH SECURITY ELEMENT

(54) Titre : VITRE DE FENETRE AVEC UN ELEMENT DE SECURITE

G00002

(57) Abstract: The invention relates to a window pane (1) to reduce the effect of a pressure wave or shock after an explosion, said window pane being provided with a security element and comprising at least two panes arranged at a separation from each other enclosing a space between said panes which are assembled to each other in the boundary regions thereof by means of a spacer frame with the formation of edge grooves. Said window pane (1) is characterised in that the security element is flexible, made from a highly tear-resistant material, arranged in at least one of the edge grooves and at least one end of the security element is run outside the edge groove.

(57) Abrégé : L'invention concerne une vitre de fenêtre (1) pour atténuer l'effet d'une onde de pression ou de choc après une explosion, dans laquelle la vitre de fenêtre est pourvue d'un élément de sécurité et se compose d'au moins deux vitres disposées à distance l'une de l'autre et enfermant un espace entre elles, qui sont assemblées l'une à l'autre dans leurs régions de bord à l'aide d'un cadre d'écartement avec formation de gorges de bord. La vitre de fenêtre (1) selon l'invention se caractérise en ce que l'élément de sécurité est flexible, se compose d'un matériau à haute résistance à la déchirure, est disposé à l'intérieur d'au moins une des gorges de la gorge de bord.
