

## A B S T R A C T

## COMPOSITE SHEET

5           A composite sheet includes a nonwoven fabric 2 and a  
plurality of fine, flexible and continuous filaments 3  
extending parallel one to another in a first direction and  
spaced apart one from another in second direction orthogonal  
to the first direction and bonded to the nonwoven fabric 2,  
10 wherein the nonwoven fabric 2 and the continuous filaments 3  
are formed with a plurality of recoverable crepes 4 extending  
in the second direction and continuously arranged in the first  
direction.
