

AN INFORMATION OUTPUT DEVICE AND
A METHOD FOR MANUFACTURING THE SAME

ABSTRACT

5

According to embodiments of the present invention, an information output device is provided. The information output device includes a substrate, a printed output device arranged on the substrate, the printed output device being configured for outputting information, and a power supply configured to supply power to the printed output device.

10 According to further embodiments of the present invention, a method for manufacturing an information output device is also provided.
