

ROBOT ASSISTED SURGICAL TRAINING

ABSTRACT

5

A surgical training system and method. The system comprises means for recording reference data representing a reference manipulation of a computer generated model of an object by a master user; means for physically guiding a trainee user based on the recorded reference data during a training manipulation of the model of the object
10 by the trainee user; and means for recording assessment data representing an assessment manipulation of the model of the object by the trainee user without guidance.
