

ABSTRACT

Provided are a separator-attached resin sheet group for sealing electronic device from which a desired resin sheet can be easily selected, and a method for selecting a separator-attached resin sheet for sealing electronic device. The present invention relates to a separator-attached resin sheet group for sealing electronic device, in which separators are classified by using colors according to the thickness or sort of resin sheets for sealing electronic device; and to a separator-attached resin sheet group for sealing electronic device including a plurality of separator-attached resin sheets for sealing electronic device to which marks are attached, the marks being in accordance with the thickness or sort of the resin sheets for sealing electronic device.
