(54) Title: FLUIDIC DEVICES INCLUDING HYBRID BONDING, AND METHODS OF MAKING THE SAME

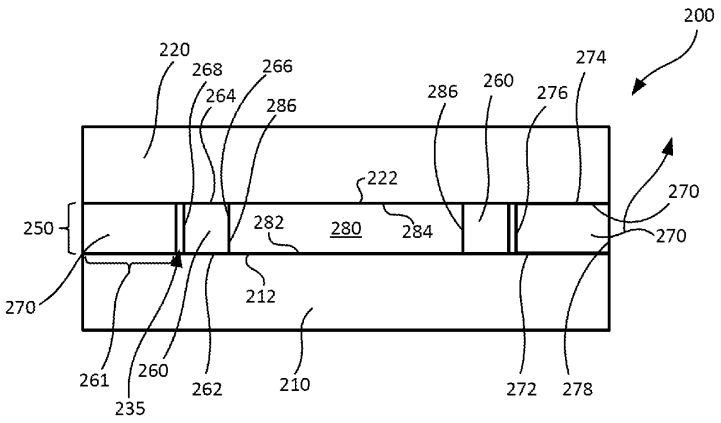

FIG. 2B

(57) Abstract: A flow cell can comprise a first substrate; a second substrate; and/or an adhesive layer that couples the first substrate to the second substrate. The adhesive layer can comprise a first adhesive and a second adhesive. A flow channel can be at least partially defined by the first substrate on a flow channel first side, by the second substrate on a flow channel second side opposite the flow channel first side, and by the first adhesive between the first substrate and the second substrate. The first adhesive can be disposed between the flow channel and the second adhesive.
