(54) Title: COMPUTERIZED SYSTEMS AND METHODS FOR PACKAGE DELIVERY

FIG. 3

(57) Abstract: Embodiments of the present disclosure include computer-implemented systems and methods for package delivery. The method may comprise receiving a customer order, generating an order identifier, associating each item of the customer order with the order identifier, and determining an intended delivery destination for each item. The method may further comprise causing the user-device to display a first indication to sort each item based on the storage space associated with the intended delivery destination, display a second indication to sort the sorted each item based on the delivery route, display a third indication to place the sorted each item into a container, without regard to a status of the other items of the customer order, and display a fourth indication to deliver the placed items of the plurality of items to the intended delivery destination, without regard to the status of the other items of the customer order.
