(54) **Title:** INFORMATION AND MANAGEMENT SERVICE PORTAL FOR SUBSCRIBERS OF COMMUNICATION SYSTEMS

(57) **Abstract:** Means for providing a subscriber of a communication system with the capability to access properties of an ongoing connection between a terminal of the subscriber and a gateway node of the communication system, wherein the gateway node constitutes an interface between at least two packet-switched communication networks of the communication system. A method comprises the steps of providing, at the gateway node, a service portal offering information and management services relating to a record of at least one property of the ongoing connection; and invoking, by the subscriber, at least one of the information and management services directly via the service portal during the ongoing connection. A network node, terminal, system, and computer program product are configured accordingly.
