

ABSTRACT

THIS SHEET HAS BEEN
REPLACED

A wheel cover 15 is provided with a radial bearing 13 adapted to support a driving shaft 7 at its axial one end portion. The driving shaft 7 has its actuating mechanism side shaft portion for supporting an actuating mechanism 20 so extended as to be supported by the radial bearing 13. so that a shaft deflection can be decreased at the time of actuating operation of the actuating mechanism 20 to avoid a shaft deformation.
